CARA

METAL PAD

One of the most inspiring things in nature are mountains. It separates lands like a big partition screen of the nature, but gives a beautiful view when you go above them. Mountains inspired us to create "Peak" - free standing screens.

When you need to focus on your individual tasks or need some privacy - place partitions on the table easily and remove them when you like to have some teamwork, move them around as you wish to divide the table space into needed smaller spaces for individual work. "Peak" screens - you can

move the mountains! Screens are light, but stable at the same time. It has a thin metal pad with felt under it to avoid scratching the table while moving the screens. You can choose from a variety of standard fabrics to make it as a nice interior element as well as practical divider. Free standing "Peak" screens are great for temporary partitioning table space into required spaces. When you don't need it - you can hang it under the table in to special attached slots.
